

ABOUT US

The Media Resource Center (MRC) is a multimedia library for the College of Architecture and Environmental Design at California Polytechnic State University, San Luis Obispo (Cal Poly).

The Center maintains a collection of 5,000+ material samples, including traditional, green, and smart products from leading manufacturers around the world. Students and faculty use these materials to gain a hands-on understanding of how materials work and to produce well-researched projects.

Please send samples to:

Vickie Aubourg (Director, MRC)
